

7 said structure having a tendency to be combustible in the presence
8 of oxygen and non-combustible in the presence of an inert gas at such times as the
9 housing is at least partially disposed in the bath of molten metal.

A5
1 67. A support as defined in claim 66 in which the housing is formed of a heat
2 resistant ceramic.

1 68. A support as defined in claim 66 in which the internal structure includes a
2 load bearing graphite leg.

REMARKS

The foregoing Amendment corrects certain typographical errors in the Specification. None of these changes include any new matter. In addition, some claims have been added to round out the protection to which the Applicant feels entitled.

It is believed that this amendment places the application in better condition for examination and therefore its entry is appropriate.

A fee for the additional claims is enclosed.

Respectfully submitted,

Charles W. Chandler
